# Green Communications and Networking

Filesize: 4.9 MB

Reviews

It is an amazing ebook i actually have at any time study. We have read and so i am certain that i will likely to read through yet again once again later on. Your way of life period will likely be change when you complete looking at this pdf.

GREEN COMMUNICATIONS AND NETWORKING

To get **Green Communications and Networking** PDF, make sure you click the hyperlink listed below and download the document or have accessibility to additional information which are relevant to GREEN COMMUNICATIONS AND NETWORKING book.

Taylor & Francis Inc. Hardback. Condition: new. BRAND NEW, Green Communications and Networking, F. Richard Yu, Xi Zhang, Victor C. M. Leung, Green Communications and Networking introduces novel solutions that can bring about significant reductions in energy consumption in the information and communication technology (ICT) industry-as well as other industries, including electric power. Containing the contributions of leading experts in the field, it examines the latest research advances in green communications and networking for next-generation wired, wireless, and smart-grid networks. The book presents cutting-edge algorithms, protocols, and network architectures to improve energy efficiency in communication networks. It illustrates the various aspects of modeling, analysis, design, management, deployment, and optimization of algorithms, protocols, and architectures of green communications and networking. The text examines energy-efficient hardware platforms, physical layer, networking, and applications. Containing helpful references in each chapter, it also: * Proposes a mechanism for minimizing energy consumption of wireless networks without compromising QoS * Reviews recent development in utility communication networks, including advanced metering infrastructure and SCADA * Studies energy-efficient rate adaptation in long-distance wireless mesh networks * Considers the architectural design of energy-efficient wireline Internet nodes * Presents graph-theoretic solutions that can be adopted in an IP network to reduce the number of links used in the network during off-peak periods * Outlines a methodology for optimizing time averages in systems with variable length frames * Details a demand-based resources trading model for green communications The book introduces a new solution for delivering green last-mile access: broadband wireless access with fiber-connected massively distributed antennas (BWA-FMDA). It also presents a methodology for optimizing time averages in systems with variable length frames. Surveying a representative number of demand and response methods in smart grids, the text supplies you with the understanding of smart grid dynamics needed to participate in the development of...
