

Aristarchus of Samos the Ancient Copernicus: A History of Greek Astronomy to Aristarchus Together with Aristarchus's Treatise on the Sizes and Distances of the Sun and Moon (Paperback)

By Sir Thomas Heath

Createspace Independent Publishing Platform, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. ARISTARCHUS, who flourished in the first half of the third century B.C., is chiefly known as the only philosopher or astronomer of antiquity who taught that the earth moves round the sun. This doctrine is, however, not mentioned in the only writing of his which has been preserved, and the little we know about it is derived from allusions to it made by subsequent writers. All the same, his little book, *On the Sizes and Distances of the Sun and Moon*, is of great importance, and Sir Thomas Heath's new and critical edition, accompanied by a translation, commentary, and notes, is therefore a most welcome addition to the literature of astronomical history. Considering that the idea of the earth being in the centre of the universe reigned undisturbed until less than four hundred years ago, it is one of the most surprising facts in the history of astronomy that its motion round the sun should have been proposed more than 1700 years before the time of Copernicus, and that it should only have been accepted by one single philosopher, Seleucus,...
