Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1902 Excerpt: .ascertain whether the maximum and minimum thermometers are registering properly, and should be made at all third class observatories, i.e., observatories at which 8 A.M. observations only are recorded. It is not necessary for second class observers to make test observations of this kind, as the io and 16 hours observations, if taken in accordance with the instructions recently issued, usually show whether the maximum and minimum thermometers register correctly. The following is the rule laid down in the Hints to observers, given in the daily note-book of 8 A.M. observations, for these test observations: --Test the maximum and minimum thermometers once a month to ascertain if they register properly, according to the instructions issued for that purpose. In order to do this observers at third class observatories should, at east once a month, read (but not set) the maximum thermometer shortly before sunset and compare...
