TACTILE DISPLAY USING LED

LAP Lambert Academic Publishing Jan 2012, 2012. Taschenbuch. Book Condition: Neu. 220x150x4 mm. This item is printed on demand - Print on Demand Neuware - The goal of this project is to give better quality of life for the visually impaired personnel. The main objective of this project is to describe about the wearable device that converts visual information into a tactile signal, but we minimize this project by using dot matrix display instead of using the tactile display because...

Reviews

Great electronic book and useful one. Better then never, though i am quite late in start reading this one. You can expect to like the way the author compose this ebook.

-- **Matteo Johnson**

The ideal publication i ever read through. It is writter in simple words and never hard to understand. Your daily life span is going to be convert once you full looking over this ebook.

-- **Tanner Willms PhD**

This book will be worth buying. Better then never, though i am quite late in start reading this one. You may like how the blogger compose this publication.
