With the foregoing general points in mind to guide him in possible modifications of the treatment for each patient, the instructor begins the process of systematic mental refitting. This work usually falls, I have found, into definite psychological steps; but the varying circumstances, temperaments, and conditions of each individual must be dealt with here also. The treatment is a series of progressive interviews, each meeting growing out of the preceding meeting; but any arbitrary plan for fitting certain points into certain interviews or even any fixed rule for the order in which these points shall be attempted is quite impossible. With some persons one point can be made at each meeting; with others it may be necessary to devote several interviews to the taking of Process of mental refitting falls into generally definite psychological steps. Patient s attention must be caught and then...
