Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from The Thorny Way of Truth, Vol. 6: Documents on the Violation of the Laws of Conservation This article is dedicated to the anti-gravitational machines which use inertial centrifugal forces for their drive. First I set a clear border-line between the potential and inertial forces, as in today's physics, under the pernicious influence of the theory of general relativity, this border has become very blurred. I show that for gravitational and electric (electrostatic) forces Newton's third law is valid, but for magnetic forces it can be violated. The question is whether Newton's third law can be violated for inertial forces. I show that for collisional forces it cannot be violated and I analyse to which extent was it violated by centrifugal forces. I do not analyse the Coriolis forces and I mention only briefly the last successes of Sandy Kidd in violating this law by the help of gyro forces. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
