

An Analysis of Speeding-Related Crashes: Definitions and the Effects of Road Environments (Paperback)

By National Highway Traffic Safety Administ

Createspace Independent Publishing Platform, United States, 2013. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Speeding is reported in the Fatality Analysis Reporting System (FARS) as a driver-level attribute that combines driving too fast for conditions or in excess of posted speed limit. There is a growing need to parse out these two factors, especially for those designing countermeasures. The report, using data from the State Data System quantifies the extent of these two aspects related to speeding using data from six States whose police accident reports actually parse these out.

Reviews

This book will be worth getting. Better then never, though i am quite late in start reading this one. Its been written in an extremely basic way which is only right after i finished reading this book through which actually altered me, alter the way i believe.

-- **Mr. Enrico Lesch**

The most effective publication i at any time read. We have study and i am sure that i will likely to read yet again once again in the foreseeable future. You will not truly feel monotony at anytime of your time (that's what catalogs are for about in the event you request me).

-- **Mr. Rafael Hoeger**
