

The Training School Quarterly, Vol. 5: October, November, December, 1918 (Classic Reprint) (Paperback)

By Mamie E Jenkins

Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from The Training School Quarterly, Vol. 5: October, November, December, 1918 Mathematics is at once the oldest, the most progressive, and the most far reaching of all the sciences. The History of Education shows that no people have been more Open-minded than the teachers of mathematics. We realize that we have made mistakes in the past along with the teachers of all other subjects, but we wish to correct those mistakes and are correcting them. Within the last decade, six international congresses of mathematics have been held, numbers of mathematical societies with growing memberships have been organized, hundreds of scientific journals are devoted in part or exclusively to mathematical publications, scores of valuable treatises have been written on the teaching of mathematics. As a result great changes have been made in the courses of study in mathematics for the high school, particularly in the first two years. Many schools are offering a course in intuitive or inventional Geometry before any Algebra has been studied beyond that found in a good high school Arithmetic. This course in experimental Geometry...

Reviews

This ebook might be worthy of a read, and far better than other. it was writtern really flawlessly and useful. I found out this pdf from my i and dad recommended this ebook to learn.

-- Prof. Ruben D'Amore PhD

This written pdf is great. It is really simplistic but surprises within the 50 percent of the pdf. I realized this pdf from my dad and i advised this pdf to understand.

-- Mr. Milford Jakubowski IV
