Createspace Independent Publishing Platform, 2010. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Release 3 Prepared by Pacific Northwest National Laboratory for the Federal Energy Management Program, U.S. Department of Energy If you like this book, please leave positive review. Overall, this guide highlights OM programs targeting energy and water efficiency that are estimated to save 5 to 20 on energy bills without a significant capital investment. Depending on the Federal site, these savings can represent thousands to hundreds-of-thousands dollars each year, and many can be achieved with minimal cash outlays. Why buy a book you can download for free? First you gotta find it and make sure it s the latest version (not always easy). Then you gotta print it using a network printer you share with 100 other people - and its outta paper - and the toner is low (take out the toner cartridge, shake it, then put it back). If it s just 10 pages, no problem, but if it s a 250-page book, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. An engineer that s paid \$75 an hour has to do this himself (who has assistant s anymore?). If you are paid more than \$10 an hour and use an ink jet printer, buying this book will save you money. It s much more cost-effective to just order the latest version from This book is published by 4th Watch Books and includes copyright material. We publish compact, tightly-bound, full-size books (8 1/2 by 11 inches), with glossy covers. 4th Watch Books is a Service Disabled Veteran-Owned Small Business (SDVOSB).
