## REDUCING THE VULNERABILITY OF THE FORMER MACEDONIAS AGRICULTURAL SYSTEMS TO CLIMATE CHANGE: IMPACT ASSESSMENT AND ADAPTATION OPTIONS

World Bank Publications. Paperback. Condition: New. 144 pages. Dimensions: 9.8in. x 7.0in. x 0.3in. Agriculture is one of the most climate-sensitive of all economic sectors. In many countries, such as in FYR Macedonia, the risks of climate change are an immediate and fundamental problem because the majority of the rural population depends either directly or indirectly on agriculture for their livelihoods. The risks of climate change to agriculture in FYR Macedonia cannot be effectively dealt with-and the opportunities cannot be effectively exploited-without a clear plan for aligning agricultural policies with climate change, developing the capabilities of key agricultural institutions, and making needed investments in infrastructure, support services and on-farm improvements. Developing such a plan ideally involves a combination of high-quality quantitative analysis, consultation with key stakeholders, particularly farmers and local agricultural experts, and investments in both human and physical capital. The experience of FYR Macedonia, highlighted in this work, shows that it is possible to develop a plan to meet these objectives-one that is comprehensive and empirically driven as well as consultative and quick to develop. The approach of this study is predicated on strong country ownership and participation, and is defined by its emphasis on win-win or no regrets solutions to the multiple challenges posed by climate change for farmers in FYR Macedonia. The solutions are measures that increase resilience to future climate change, boost current productivity despite the greater climate variability already occurring, and limit greenhouse gas emissions. Reducing The Vulnerability of FYR Macedonias Agricultural Systems to Climate Change: Impact Assessment and Adaptation Options applies this approach to the FYR Macedonia with the goal of helping the country mainstream climate change adaptation into its agricultural policies, programs, and investments. The study projects impacts of climate change on agriculture across FYR Macedonias three agro-ecological areas through forecast variations in temperature...
