John Wiley and Sons Ltd, United States, 2002. Paperback. Condition: New. Language: English . Brand New Book. How do you fold a sheet of paper into the shape of a whale? How do you measure the area of a pizza pie? How can you draw a circle within a circle without lifting your pencil from the paper? Now you can discover the answers to these and other fascinating questions about elementary geometry--the study of shapes. Packed with illustrations, Geometry for Every Kid uses simple problems and activities to teach about acute and obtuse angles, parallel and perpendicular lines, plane and space figures, and much more! By arranging the pieces of an intriguing Chinese puzzle called a tangram, you ll explore all the different shapes you can form. You ll also learn how to create a colorful 3-D drawing that seems to rise right off the page! And, by building a geoboard, you ll discover a quick, fun way to compare the area of different geometric figures. Each of the activities is broken down into its purpose, a list of materials, step-by-step instructions, expected results, and an easy to understand explanation. Every project has been pretested and can be performed safely and inexpensively in the classroom or at home.
