This boxed set brings together in one specially priced set the two authorized guides to OpenGL, the OpenGL 1.4 Programming Guide, 4/e, and the OpenGL 1.4 Reference Manual, 4/e. These books are such standards in the field that programmers commonly refer to them simply as 'the red book' and 'the blue book.' These fourth editions describe all the latest features of OpenGL versions 1.3 and 1.4, as well as the important OpenGL Architecture Review Board (ARB) extensions. The most important of the new extensions are the vertex and fragment programs, also referred to as 'shaders', which allow for the easy programming of professional-quality graphics effects. As with all previous versions of these books, they are written by some of the most influential developers in the field, under the auspices of the official OpenGL ARB. 1184 pp. Englisch.
