Pegasus. 1 Cloth(s), 2014. hard. Book Condition: New. In the heart of Tuscany at the dawn of the Renaissance, Piero della Francesca became a painter and mathematician, revealing his innovative mind in some of the best known images from that period as well as his unusual writings on geometry. Yet as a personality, Piero remains a mystery, and he left an enigmatic legacy that ranges from the merging of religion and mathematics to his use of perspective to make painting a "true science." Also the author of *By Design: Science and the Search for God and Picasso and the Chess Player*, Larry Witham gives us the story of one remarkable artist of the early Italian Renaissance painter at the crossroads of our modern revolutions in art, religion, science."The author grapples with a sweeping retelling of the known story, not only in the context of Italian early Renaissance culture but also in terms of how that story was interpreted in 19th and 20th-century criticism. It is in this latter perspective that Witham's contribution is most illuminating, particularly the chapter entitled 'Piero and Modernity'."New Criterion 354.
