ANALYTIC FUNCTION SPACES

Condition: New. Publisher/Verlag: VDM Verlag Dr. Müller | Properties of Operators and Duality | The core of this book are Banach spaces of analytic functions on the unit disk. Not only do we study how operators like composition operators, multiplication operators and weighted composition operators behave when operating on different such spaces, but also how the Banach spaces in question relate to other Banach spaces. We study the dual and predual spaces of Banach spaces and introduce some new spaces in the process. Properties of the operators mentioned above that we investigate are amongst others; the spectrum, the closed range property and boundedness. The book is based on three original papers that have been published in international mathematical journals with high impact factors. The original intention of writing this book was the fact that it served as the PhD thesis of the author. | Format: Paperback | Language/Sprache: english | 171 gr | 220x150x6 mm | 116 pp.
