What chemical or explosive is it, in your observation, that is used with the greatest destructive effect by evil-minded persons for that purpose Mr. Coyne. Nitroglycerin. I think. Mr. Patterson, of the chemical department of the Du Pont Powder Co. , can answer that question better than I can. Mr. Denison. My question is, What chemical or explosive is it, in your opinion, that in the past has been used with the greatest deadly effect in unlawful explosions by evil-minded persons STATEMENT OF MR. C. A. PATTERSON, CHEMIST, DU PONT POWDER CO. Mr. Patterson. If a man knows the chemical business, he could make explosives out of quite a number of things that he could buy in drug stores or grocery stores. If you are referring particularly to the safe blower--if that is what you intend to cover--the safe blower nine times out of ten steals dynamite. He will take that dynamite from the little outlying stores around mines or quarries or railroad-construction work or road-building work. He will steal a case or so of that dynamite and possibly extract the nitroglycerin from the dynamite. He can do that in a number of ways by using a solvent: often by soaking it out with water. He can take the nitroglycerin out from the dynamite, and he will separate that nitroglycerin and put it in a bottle, so that he can utilize it. I will say, without any fear of contradiction, that from 90...
