CreateSpace Independent Publishing Platform. Paperback. Condition: New. This item is printed on demand. 356 pages. Dimensions: 9.0in. x 6.0in. x 0.8in. An excerpt of a review from The American Journal of the Medical Sciences, Volume 122, July, 1901: THE study of comparative pathology has but recently attracted the attention which it deserves. To the zoologist, to the pathologist, and to the clinician it has a fascination as well as a large amount of practical value. The book which forms the text of this review presents the subject in an extremely attractive manner, avoiding, on the one hand, the too elaborate consideration of the pathological conditions discussed, and, on the other hand, going sufficiently into detail to make the book more useful to the practitioner of medicine than would be a more comprehensive text-book upon the same subject. It is full of suggestive thoughts bearing upon the pathology of human disease, and its perusal cannot fail to interest as well as broaden the views of the reader. The main argument which the author constantly brings up to explain pathological lesions in the human being is the lessened resistance and greater instability of parts latest developed in the scale of evolution and in those tending to return to the ancestral type. It might be said that this argument is at times rather overworked. However, it undoubtedly plays an important part in human pathology, and it is well that a clear exposition of a believer in this factor of disease should be heard. One of the most interesting chapters in the book is that upon the deformities of the chest in the light of its ancestry an growth, in which the author shows the fallacy of the statement that in pulmonary tuberculosis the antero-posterior diameter of the chest is diminished. He explains the fact...
