

# Finite Element Analysis of Hard Turning by using Ansys/Implicit

By Saurabh, Kunal

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | FEM on Hard Turning | ANSYS/Implicit finite element simulation of hard turning process was performed. The modeling work covers influence of edge size on stresses distribution and estimation of flow stress data. The stress generation on cutting honed edge cutting tool in hard turning was predicted using finite element method of ANSYS/Implicit. The cutting simulation between carbide tool and AISI 1045, AISI 4345, AISI 52100 gave good predictions of stress distribution for the given cutting conditions. The obtained results from FEM indicate that the maximum Von-Misses (effective) stress acting on cutting insert with the hone tool edge while machining of AISI 4340 has the smallest value of 1607 MPa. | Format: Paperback | Language/Sprache: english | 107 gr | 220x150x3 mm | 68 pp.

#### Reviews

This is actually the greatest pdf i actually have read until now. it absolutely was writtern really properly and beneficial. Your life period will be change when you complete looking over this pdf.

-- Lurline Little

It is really an awesome ebook which i have ever go through. It is actually writter in straightforward terms and not confusing. I am very easily could get a satisfaction of reading a written ebook. -- Clotilde Wiegand
