Createspace, United States, 2013. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book ***** Print on Demand *****.Aviation is an interesting field of real-life adventure where problems are solved through experimentation and research. The area of aviation research, technology, and development is constantly growing, and many marvels in this field await our next generation. Through this unit, students will read several selections about aviation, research topics of interest, conduct scientific experiments, construct aircraft, and make connections with prior knowledge. The Courage to Soar has been designed for students in third through fifth grades, and, with some minor modifications, it will interest and challenge grades six and seven as well. Even though the content is primarily science, the activities are rich in the language art skills of reading, writing, speaking, and listening. For many of the lessons, a student text with a vocabulary list is provided for guided reading instruction. In states where science subjects are mandated, teachers may use this guide to meet their language arts objectives while presenting enriching science activities to their students. This educational guide is made up of ten activities, which are divided into one or more lessons about the topic. The objectives and national standards are given at the beginning of each activity. However, the location of the material lists and the pre-lesson instructions varies. For some activities, these are given at the beginning of the activity and include the necessary materials and instructions for all of the lessons in that activity. For other activities, the lists are simply too long, so they are included at the beginning of each individual lesson. The procedure for each lesson is always given with the lesson. When student text and vocabulary are a part of the lesson, they are located after the procedure....
