

Modeling flow sensor signal processing and information technology and industrialization to achieve integration of research and application of two books

Filesize: 7.26 MB

Reviews

Comprehensive guide for pdf fanatics. It is filled with knowledge and wisdom It is extremely difficult to leave it before concluding, once you begin to read the book.

(Valentin Thompson)

MODELING FLOW SENSOR SIGNAL PROCESSING AND INFORMATION TECHNOLOGY AND INDUSTRIALIZATION TO ACHIEVE INTEGRATION OF RESEARCH AND APPLICATION OF TWO BOOKS

paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 306 Publisher: Science Pub. Date :2011-06-01 version 1. Flow is the process of detection is measured in one of the most complex. Many different types of flow sensors. a wide range of applications. Compiled by the Xu Kejun the flow sensor signal modeling. processing and realization of the author's research-based. vortex flow sensors. Coriolis mass flow sensor and electromagnetic flow sensor flow sensor for the study of these three objects around signal modeling. signal processing and systems to achieve three key technologies. introduces the latest progress and application of the results. Flow sensor signal modeling. processing and realization of the establishment of the flow sensor signal model describing the relationship between the input and output. to explain its essential character; the use of advanced digital technology to handle the traffic sensor output signal. and enhance information extraction capabilities. improve performance indicators. to expand its scope of application; with DSP and MCU development of real-time processing system. used in the industrial scene of the actual measurement. to obtain good results. Flow sensor signal modeling. processing and realization of available in the automation. instrumentation. computer applications. petroleum. chemical industry. metallurgy. paper and other industries of engineering and technical personnel. as well as relevant professional higher education teachers. undergraduates and graduate reference. Contents: Information technology and industrial research and application integration of the two series' order Preface Chapter 1 vortex flow sensor signal modeling and signal processing methods 1.1 Introduction 1.2 Vortex Vortex flow sensor signal modeling 1.2.1 Vortex Traffic signal model mechanical vibration noise signal model 1.2.2 1.2.3 Summary 1.3 vortex flow sensor signal processing research status 1.3.1 1.3.2 1.3.3 Power spectrum analysis method of adaptive notch filter wavelet 1.3.4...
