THE NATIONAL VOCATIONAL EDUCATION QUALITY PLANNING MATERIALS: SINGLE-CHIP C LANGUAGE APPLICATION TECHNOLOGY AND PRACTICE [PAPERBACK]

To get **The national vocational education quality planning materials: single-chip C language application technology and practice [Paperback]** eBook, please access the hyperlink below and save the document or get access to additional information which might be in conjuction with THE NATIONAL VOCATIONAL EDUCATION QUALITY PLANNING MATERIALS: SINGLE-CHIP C LANGUAGE APPLICATION TECHNOLOGY AND PRACTICE [PAPERBACK] ebook.

paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment.Paperback Pages Number: 289 Language: Simplified Chinese Publisher: Tsinghua University Press Limited; 1st edition (June 1. 2009). National vocational education quality planning materials: single-chip C-language application technology and practice based project as a carrier. prepared by a task-driven approach . the AT8951 microcontroller. combined with the Keil C51. Proteus. microcontroller development system software. the main line with a large number of examples from the application point of view. the system 51 single-chip C Programming Language design and the control system are applied technology. Through the microcontroller and its smallest applications. the use of the microcontroller system development software. microcontroller c language base. LED advertising light design. the key identity design. simple digital electronic clock design. the design of simple frequency meter. single-chip dual-machine communication design. digital voltage the design of table design. the design of a simple waveform generator. dot-matrix LED display. LCD display circuit design. digital thermometer design and engineering application design examples l4 projects to introduce the AT89S51 microcontroller pin functions common interface circuit. the input port I / O applications. typical interrupt system. timer / counters. serial port theory and application of microcontroller A / D and D / A interface. dot matrix LED. LCD. real-time clock and 12C memory devices are connected. as well as single-chip C language programming and applications development. The content of the national vocational education quality planning materials: single-chip C-language application technology and practice to explain easy to understand. progressive. step by step. highly practical. Microcontroller course as a vocational college. undergraduate. Radio and Television University to teach. learn. do one of the teaching materials. suitable for 51 microcontroller for beginners and 51 microcontroller to engage in project development and technical personnel...
