

Best Practices for Protecting EMS Responders During Treatment and Transport of Victims of Hazardous Substance Release

By Occupational Safety and Health Administration

CreateSpace Independent Publishing Platform. Paperback. Book Condition: New. This item is printed on demand. Paperback. 100 pages. Dimensions: 11.0in. x 8.5in. x 0.2in. In 2005, OSHA published the Best Practices for Hospital-Based First Receivers guide that provided guidance for those healthcare facilities that receive and treat victims of hazardous substance releases. At the request of stakeholders that participated in the development of that guide, OSHA has developed a similar guide for emergency medical service (EMS) responders who provide medical assistance during an incident involving a hazardous substance release. This guide, OSHA 3370-11, Best Practices for Protecting EMS Responders, is intended for employers of EMS responders and discusses the measures these employers need to take to protect their EMS responders from becoming additional victims while on the front line of medical response. EMS responders are broadly defined here as the individuals who provide pre-hospital emergency medical care and patient transportation. Some EMS responders are also assigned duties that support patient care, including patient decontamination. For the purpose of this guide, the term EMS responder refers to all levels of emergency medical personnel involved in incident response (e. g. , emergency medical technicians EMTs, paramedics, and others who perform similar duties). While many...
