## COGNITIVE SCIENCE: A PHILOSOPHICAL INTRODUCTION (HARDBACK)

Sage Publications Ltd, United Kingdom, 2002. Hardback. Book Condition: New. 242 x 170 mm. Language: English . Brand New Book. This is the first major textbook to offer a truly comprehensive review of cognitive science in its fullest sense. Ranging from artificial intelligence models of neural processes and cognitive psychology to recent discursive and cultural theories, Rom Harre offers an original yet accessible integration of the field. At its core, this textbook addresses the question How can psychology become a science? . The answer is based on a clear account of method and explanation in the natural sciences and how they can be adapted to psychological research. Rom Harre has used his experience of both the natural and the human sciences to create a text on which exciting and insightful courses can be built in many ways. The text is based on the idea that underlying the long history of attempts to create a scientific psychology there are many unexamined presuppositions that must be brought to light. Whether describing language, categorization, memory, the brain or connectionism the book always links our intuitions about how we think, feel and act in the contexts of everyday life to the latest accounts of the neural tools with which we accomplish the cognitive tasks demanded of us. Computational and biological models are used to link the discursive analysis of everyday cognition to the necessary activities of the brain and nervous system. Fluently written and well structured, this is an ideal text for students who want to gain a comprehensive view of the current state of the art with its seeming divergence into studies of meanings and studies of neurology. The book is divided into four basic modules, with suggestions for three lectures in each. The plan is related to the overall pattern of the...
