

A Remote Sensing Survey to Locate the Remains of USS Dorado (Ss-248) off of Bahia De La Ascension, Quintana Roo, Mexico (Paperback)

By Douglas E. Campbell

Lulu.com, United States, 2015. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.The Maritime Education and Research Society (MERS) is a non-profit 501(c)(3) organization whose aims and objectives are to research and to advance education and training in the techniques pertaining to the study of various maritime fields of endeavor for the benefit of the public. Such fields include the continuing assessment of ecological impacts on coral reefs around the world, the research of maritime events that have shaped history, underwater archeology, the training of individuals and groups in the above fields, and the publication of all such research for the continuing education of the public. Our first field study was called The Dorado Expedition and continues to this day. This is a research program to determine if a World War II US submarine was lost on the coral reef system off the Yucatan Peninsula as mentioned by Mexican locals in the 1970s.
