

## The Universe on a Grand Scale: A Short Story of the Universe: Past, Present and Future, 2nd Edition (Hardback)

Filesize: 3.57 MB

### **Reviews**

*This book is great. it absolutely was writtern quite properly and beneficial. Its been written in an extremely basic way and it is merely after i finished reading through this ebook in which basically changed me, affect the way i really believe.*

## THE UNIVERSE ON A GRAND SCALE: A SHORT STORY OF THE UNIVERSE: PAST, PRESENT AND FUTURE, 2ND EDITION (HARDBACK)

To download **The Universe on a Grand Scale: A Short Story of the Universe: Past, Present and Future, 2nd Edition (Hardback)** eBook, please follow the link beneath and download the document or have access to other information which might be in conjunction with THE UNIVERSE ON A GRAND SCALE: A SHORT STORY OF THE UNIVERSE: PAST, PRESENT AND FUTURE, 2ND EDITION (HARDBACK) ebook.

CC Korgel Publishing, 2014. Hardback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Spacetime is curved and space is virtually flat and expanding; one of the greatest enigmas of all time in human existence. Distances to farthest galaxies from us are finite defining the edge of our Grand Scale Universe. Distances among galaxies and galaxy clusters are measured in light distance to billions and even trillions of light years. Earlier space was curved, transitioning to virtually flat space about six billion years ago as I show mathematically and has been observed. In the math derivation I show how the Universe is a four dimensional hyperboloid virtually flat in three dimensions and going from deceleration to acceleration and positive to negative curvature, thus agreeing with observations! This is the battle between matter and dark energy in controlling the Universe described by recent observation and Einstein s General Relativity! I discover how Einstein s General Relativity describes the behavior of the accelerating expanding Universe. I solved Einstein s field equations in dark matter and dark energy in current amounts deduced from observation. These fuel the cosmic Universe. My results show gravity of dark energy and matter is Einstein s curvature for which I derive a Hubble form integrating Einstein and Hubble physics. Using these discoveries I lay out the Universe through all space and time in colored figures and tables. The Universe contains light from galaxies that can be seen as well as light we cannot see. Light we can see has redshift  $z$ , and light we cannot see I label redshift  $z$  . Using both categories of light and my equations of the Grand Scale Universe, I scope the entire Universe throughout all space and time going back 13.7 billion years! This is the time of origin...
