AUTOMATIC VEHICLE LOCATION

Alphascript Publishing. Taschenbuch. Condition: Neu. Neuware - Automatic vehicle location (AVL or telelocating; telelocating in EU) is a means for automatically determining the geographic location of a vehicle and transmitting the information to a requester. Most commonly, the location is determined using GPS, and the transmission mechanism is a satellite, terrestrial radio or cellular connection from the vehicle to a radio receiver, satellite or nearby cell tower. Other options for determining actual location, for example in environments where GPS illumination..
