Focusing on the Pocket PC platform, this book also discusses considerations in developing Flash for set-top box systems, cell phones, and lays the foundation for devices such as the Palm. The book targets four main concepts: 1) design/development considerations, 2) creating content once & deploying to many platforms, (including info on using MM Generator to author content in Flash and serve it to Palm Pilots and cell phones that don't yet have Flash Players), 3) creating Flash content for Pocket PC, and 4) application development using Flash integrated with middle-ware. Throughout this book the authors provide guidelines, step-by-step tutorials, workflow, best practices, and case studies. The web site provides full source code, online resources, demo versions of relevant software and tips and tricks from the book. 552 pp. Englisch.
