Excerpt from The Disposal of the Sewage of Lake Forest, Illinois: A Study of the Present System and the Design of a New Plant; A Thesis Up to within the last ten years Lake Michigan has served the double purpose of a source of water supply and an agent in sewage and waste disposal for those communities lying along its shores. Of late years, however, so great has been the increase in the population of these districts and the large number of manufacturing establishments which have been set up in them, that Lake Michigan has proven incapable of suitably diluting the greatly increased amount of sewage and waste, and at the same time furnishing a supply of water sufficiently pure for drinking and domestic use.
