Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Laboratory Methods for the Experimental Study of Immunity It is presumed that the student undertaking work in an advanced subject of this nature has had an elementary training in chemistry, general biology, bacteriology and pathology. It is imperative that the student be familiar with the ordinary technique in the handling of pathogenic micro - organisms and the care of inoculated animals. The experiments outlined are those which have proved by experience to be the most serviceable in the illustration of the points under discussion in the lecture course which accompanies the experimental work. The experiments out lined comprise one year s work. For suggestions in regard to the presentation of this outline the writer is indebted to Professor H. T. Ricketts of the University of Chicago.
