Brand New Book ***** Print on Demand *****.HIGHLIGHTS The chronic riddle in the Nobel Prize winning CAPM, solved Liquidity threat in WACC NPV, explained EVA s weakness explained; new Value Creation Index introduced Over 100 figures tables; over 30 authoritative references The next global financial crisis could be only a tick away. Despite more than five decades of worldwide research, the following comments made by the Nobel Prize committee in its scientific background note to the 2013 Prize in Economic Sciences, only confirms that the world continues to sit on a financial time-bomb, and warns of the inevitable imminent disaster. . .we do not yet have complete and generally accepted explanations for how financial markets function. . .we do not yet fully understand how asset prices are determined. . .currently no widely accepted consensus (asset pricing) model exists. Mispricing of assets may contribute to financial crises and, as the recent recession illustrates, such crises can damage the overall economy To put it briefly, this book - based on a ground breaking research - bares and fixes serious, deeply hidden flaws in financial science and shows how the world s most dreaded, chronic and painful illness can be permanently cured. If you have money at stake - whether your own or otherwise - in the ocean of financial assets, take this book as your only lifeline.
