Excerpt: . . . 11 the fifth best among major countries during these 4 years. These reductions come from desirable improvements in efficiency and deployment of advanced energy technologies and practices, and continued structural shifts in our economy to lower emitting industries, and an undesirable shift of higher-emitting energy intensive industries to other countries with significantly lower energy costs. Preliminary estimates CO for 2004 indicate a possible increase of 1. 7 percent, 2 though the final data for 2004 will likely show offsetting emissions reductions in the more potent greenhouse gases such as methane. The total should therefore be well below the 4. 3 percent GDP growth we experienced last year, putting us well on track to meeting the Presidents emission intensity goal. As we seek to reduce our own emissions intensity, other fast growing economies of the world have significant opportunities to substantially...
