## Water: Exploring the Blue Planet (Hardback)

By Markus Eisl, Gerald Mansberger, Paul Schreilechner

FIREFLY BOOKS LTD, Canada, 2016. Hardback. Condition: New. Translation. Language: English . Brand New Book. Remarkable satellite photographs show where water is - or isn't - and how we are using it. Water is in crisis. We are in crisis. All life depends on water and we are running out of it, but where exactly is the water and where is it going? This book provides new insight into the world of water and contributes to a wider understanding of the current predicament. Water: Exploring the Blue Planet is essentially a map of water. It features astonishingly detailed photographs that reveal the watery health of the Blue Planet. Readers are taken aboard satellites circling the Earth from where the most technologically advanced cameras and remote sensors capture what lies below. The photographs are accompanied by descriptions and organized in thematic chapters. Water reveals the damage wrought by nature - cyclones, volcanoes, floods - and the destruction wrought by humans - vanishing reservoirs, receding glaciers, melting ice sheets. And what of our attempts to control water? How do the hydropower dams, shore stabilization structures and desert oases we build affect the movement and availability of water? How does our insatiable...
