PROGRESS IN OPTICS: VOLUME 33 (HARDBACK)

ELSEVIER SCIENCE TECHNOLOGY, United States, 1995. Hardback. Condition: New. Language: English. Brand New Book. This volume contains six review articles dealing with topics of current research interest in optics and in related fields. The first article deals with the so-called embedding method, which has found useful applications in the study of wave propagation in random media. The second article presents a review of an interesting class of non-linear optical phenomena which have their origin in the dependence of the...
