FUSION NOW: TOMORROW S ENERGY TODAY (PAPERBACK)

Createspace Independent Publishing Platform, United States, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. It s late Fall in the year 2016. Two drinking buddies; one a Lieutenant General at the U.S. Army Corps of Engineers and the other a wealthy civilian business man, discuss the advantages of developing fusion energy. The obvious conclusion is that the government needs to finish the Manhattan Project! Both men realize that the government could do in 4 years or less, what the private sector has failed to do in more than 60 years of empty promises. Fusion energy promises to solve 80 of the World s problems quickly, if only someone in the right position would take the initiative. It turns out that our 3-star General in the story is the one man in the World to get it done. General Frank Wilson just happens to be the top General at the U.S. Army Corps of Engineers. Both men are aware that once fusion arrives, all the other forms of energy will immediately become obsolete. There s no doubt or debate about that. Fusion is the ultimate energy because, unlike Fission, it promises ECSAFE: Economical, Clean, Safe, Abundant, and (virtually) Free Energy. Scientists have been creating fusion since the 1950 s. The problem is . . . containment. Our two heroes launch a quest to develop fusion containment technology now . . . rather than later. Because they are too well aware of how desperately we needed it yesterday, or sooner. They also know that later . . . may be too late! Both men know that fusion energy will end the Terror Wars and it will quell all the fears of Global Warming. Fusion will cause the economy of the entire World to surge towards...
