## GHOSTS OF GONDWANA 2016 (HARDBACK)

Potton Burton, New Zealand, 2016. Hardback. Condition: New. Language: N/A. Brand New Book. Have you ever wondered why New Zealand's plants and animals are so different from those in other countries? Why kakapo is the only parrot in the world that cannot fly, or why the kiwi lives here and nowhere else? New Zealand is an extraordinary place, unique on earth, and the remarkable story of how and why life evolved here is the subject of Ghosts of Gondwana. The challenge of explaining New Zealand's natural origins is picked up in this fully revised edition of the popular award-winning book. It presents the latest scientific research in highly readable form, highlighting studies that reveal the deep historical background of our landscapes, fauna and flora - from ancient frogs and moa to delicate insects and the magnificent southern beech forests. It introduces the latest discoveries and resolves past issues like the Oligocene drowning hypothesis. Exciting fossil discoveries are revealed and new scientific technologies and approaches to the discipline of historical biogeography are discussed - approaches that range from undersea geology to molecular clocks - and it inevitably draws attention to the debates and conflicts that distinguish different schools of opinion in this holistic branch of theoretical science. This revision incorporates the results of 10 years of intensive scientific research and includes four entirely new chapters to: focus on yesterday's maps to draw attention to the ephemeral islands in our history that have possibly acted as stepping stones for terrestrial animals and plants but today have sunk into the sea; incorporate the author's own special interest in an ancient group of jaw-moths, unknown and unnoticed by most people but with a strong message that New Zealand is part of the world when it comes to explaining where...
