Simple Questions Complex Science in Colour (Paperback)

By Peet (P S J) Schutte

Createspace Independent Publishing Platform, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.This book is in colour. These questions I raise are the thoughts that started me thinking and also questioning the validity of science. Science insist that outer space is filled with nothing but then define the nothing that they fill the entire Universe with. The nothing is becoming more and to the point where the nothing is expanding. The nothing m just then be something because the nothing is becoming more as we experience cosmic expansion. If this argument sounds silly then answer why and how nothing can be so much it becomes more even to where nothing expand as the Universe!From these questions I was able to redefine the cosmos and prove how gravity applies as the Lagrangian points, the Titius Bode law, the Coanda Effect and the Roche limit. These questions I asked science put me in a situation where I can explain the way the cosmos started. The questions served me to be able to rethink the process that science thinks is perfect and completely correct! These very simple questions showed just how wrong science is in...

Reviews

A top quality ebook and the font used was fascinating to read through. It is written in easy terms and not confusing. Its been written in an remarkably easy way in fact it is simply after i finished reading through this publication through which actually altered me, alter the way i believe.

-- **Roberto Block**

A must buy book if you need to adding benefit. We have study and so i am sure that i am going to likely to study once again again in the foreseeable future. I realized this book from my i and dad encouraged this ebook to discover.
