

Electrodynamics of Continua II

Filesize: 1.1 MB

Reviews

It is fantastic and great. Sure, it is actually play, nonetheless an amazing and interesting literature. I realized this ebook from my dad and i recommended this pdf to find out.

(Gunner Lang)

Condition: New. Publisher/Verlag: Springer, Berlin | Fluids and Complex Media | This is the second volume of a two-volume set presenting a unified approach to the electroynamics of continua, based on the principles of contemporary continuum of physics. The first volume was devoted mainly to the development of the theory and applications to deformable solid media. This volume extends the developments of the first volume to richer and newer grounds. It contains discussions on fluid media, magnetohydrodynamics, eletrohydrodynamics and media with more complicated structures. With the discussion, in the last two chapters, of memory-dependent materials and non-local E-M theory, the authors account for the nonlocal effects arising from motions and fields of material points at past times and at spatially distant points. This discussion is included here to stimulate further research in these important fields, which are presently in development stages. The second volume is self-contained and can be studied without the help of volume I. A section summarizing the constitutive equations and the underlying physical ideas, which were presented in more detail in the first volume, is included. This volume may be used as a basis for several graduate courses in engineering schools, applied mathematics and physics departments. It also contains fresh ideas and will stimulate further research in the directions the authors outline. | (Volume II).- 9 Elastic Ferromagnets.- 9.0. An Overview of Basic Equations.- 9.1. Scope of the Chapter.- 9.2. Model of Interactions.- A. Gyroscopic Nature of the Spin Density.- B. Spin-Lattice Model of Interactions.- 9.3. Balance Equations.- A. Global Balance Equations.- B. Local Balance Equations.- C. The Clausius-Duhem (C-D) Inequality.- D. Boundary Conditions.- 9.4. Constitutive Theory.- A. Saturated Ferromagnetic Elastic Insulators.- B. Free Energy.- C. Correspondence Between the Microscopic Model and the Continuous Representation.- D. Infinitesimal Strains.- E. Centrosymmetric Cubic Crystals.- F. Uniaxial Crystals.- G. Elementary...
