John Wiley and Sons Ltd, United States, 1999. Hardback. Book Condition: New. 229 x 170 mm. Language: English . Brand New Book. Assessing Adolescents with the MACI is an interpretive guide for using the Millon Adolescent Clinical Inventory--the most widely used personality assessment test for adolescents. The first book devoted exclusively to the MACI, this resource will prove a helpful guide for understanding the test, interpreting the results in clinical evaluation, and making appropriate recommendations for treatment and care management. Unlike other assessment tests developed for adults and adapted for adolescents, the MACI was created to address the unique concerns, pressures, and situations of adolescents. The MACI is also constructed using an underlying theory of personality and psychopathology. The MACI is a 160-item, 31-scale self report inventory that was designed to assess personality styles, significant problems or concerns, and clinical symptoms in adolescents. Using a true false format, the MACI surveys a wide range of personality characteristics and clinical symptoms that tend to be a focus in psychological evaluations of teenagers that either have or are suspected of having emotional or behavioral difficulties. While multi-scale personality inventories such as the MACI are useful for improving the clinician s understanding of an adolescent s personality and clinical symptoms, there are other reasons for using such instruments. The MACI can be used to formulate diagnostic hypotheses, confirm clinical diagnoses, formulate treatment plans, or assist in decision making surrounding case management and disposition planning. The MACI can be used as an outcome measure to evaluate changes in an adolescent s functioning as a result of treatment and intervention. Of course, the MACI can also be used in research studies to investigate a range of issues that pertain to adolescent psychopathology, personality, and treatment response. Drawing on a broad range of sources, including data...
