

SQL Server Tacklebox Essential Tools and Scripts for the day-to-day DBA

By Rodney Landrum

Paperback. Condition: New. For the day-to-day DBA, there are dangers around every corner; monsters waiting to strike down the unsuspecting database with a resource-hungry query, an inefficient data load, or even outright data corruption. When the worst happens, and SQL Server is down, or performance is suffering, customers are quick to complain. . During such difficult periods, you, the DBA, are the centre of attention. Suddenly, three or four people crowd your desk, laser beam focused on your every action, fully expecting you to solve the problem quickly. The success of your career as a DBA depends largely on how well-prepared you are to deal with such situations. Without verified backups, sound server documentation, and a ready supply of tried-and tested troubleshooting tools, there is no safe place to hide when the monster rears up. All you can do is buy some time, patch things up as best you can and then duck away into your cubicle, which, if you lost any data in the process, may soon be empty. However, with the tools and techniques provided in the SQL Server Tacklebox, you will be fully-equipped to fight back. Inside, you'll find scripts that will allow you to automate and...
