

Transactions of the American ceramic society, containing the papers and discussions Volume 8

By American Ceramic Society

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 110 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1906 edition. Excerpt: . . . figured as U3O8 with a molecular weight of 848. The Glazes Used. The trials were made up of pure glazes, and the uranium, figured as U3O8, was added in the following amounts: . 003, . 066, . 01, . 02, . 05 equivalents. These calculated as Na2O, U2O, 6H2O, would be. 0034, . 0068, . 0114, . 0225, and. 0570, which again would amount to. 00256, . 00513, . 00856, . 01712, . 04280 parts of U2O. The following table shows the complete chemical composition, composition of fritt, combining weight, etc. : 11 Weight of uranium oxide added to 100 gr. of dry glaze. The above table shows what the different equivalents of U3O8 would be, expressed as Na2O U2O, 6H2O when a definite weight of the material is used. Mechanical Preparation. All fritts were fused in Hessian crucibles in a small furnace until...
