By St John Ambulance Association

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1898 Excerpt: .of the Atmosphere.--The air is purified (1) by dilution: this takes place by means of diffusion, the light and heavy gases mixing with one another; (2) by perflation: this takes place by the wind or draught blowing the gases away to a distance, during which process dilution also takes place; (3) by rainfall: the atmosphere is washed, the suspended particles are precipitated to the ground, the gases are absorbed by the water and are carried to the earth; (4) by oxidation: the ozone taking a prominent part in this process; (5) by decomposition: as many of the gases are unstable compounds they easily split up under various influences into other combinations. But the most important means by which the purification of the air is brought about is the function of plants to decompose carbonic acid, fixing the carbon and setting free the oxygen. Amount of Air required.--We have seen that...
