TELEMEDICINE SYSTEM BASED ON EMBEDDED COMPUTER

LAP Lambert Academic Publishing Okt 2016, 2016. Taschenbuch. Condition: Neu. Neuware - Patient monitoring is to have a quantitative assessment of the important physiological variables of patients during critical periods of biological functions. For diagnostic and research purposes, it is necessary to know their actual value or trend of change. Telemonitoring systems are used for measuring continuously or at regular intervals, automatically, the values of the patient's important physiological parameters. Telemedicine system based on embedded computer deals with real time...
