

## Herpes Simplex and Pseudorabies Viruses

Filesize: 3.38 MB

### ***Reviews***

*The book is straightforward in go through easier to recognize. it was actually writtern extremely perfectly and useful. I am very happy to explain how this is actually the greatest publication i have read through within my individual life and might be he finest ebook for actually.*

Book Condition: New. Publisher/Verlag: Springer, Wien | The herpes group consists of viruses which have been placed together on the basis of a number of distinguishing features that they share in common (ANDRE WES, 1962). All these viruses are relatively large, possess identical morphological characteristics, contain DNA, and are extremely sensitive to inactivation by ether; these viruses are also assembled within the nucleus of the host cell and induce the formation of eosinophilic intranuclear inclusions. The epidemiology of some of the best known viruses in this group (herpes simplex, pseudorabies, and B-virus) is also similar (BURNET et al. , 1939). Herpes simplex virus exists in the latent state in man, the natural host for this virus, and becomes overt in individuals subject to some form of stress; this condition appears to be paralleled by pseudorabies virus in its natural host, swine and by B-virus in monkeys. In each instance, transmission of the virus to a susceptible host other than the natural one results usually in marked symptoms and death. This chapter is confined to a description of herpes simplex and pseudorabies viruses; B-virus is described separately elsewhere in the Hand book. Since the clinical aspects of the diseases caused by herpes simplex virus and pseudorabies virus have been well described, greater emphasis will be placed, therefore, on the basic biological and biochemical properties of these viruses; their clinical features will be discussed only briefly. | I. Introduction.- II. History.- A. Herpes Simplex Virus.- B. Pseudorabies Virus.- III. Classification and Nomenclature.- IV. Properties of the Viruses.- A. Morphology.- 1. Size.- 2. Structure.- a) Core.- b) Capsid.- c) Envelope.- B. Physical-chemical Structure.- 1. Chemical Composition.- 2. Physical Characteristics of Viral Components.- a) DNA.- b) Capsid.- 3. Buoyant Density of the Viruses.- C. Antigenic Structure.- 1. Antigenic Relationships of the Herpes Viruses.- 2....
