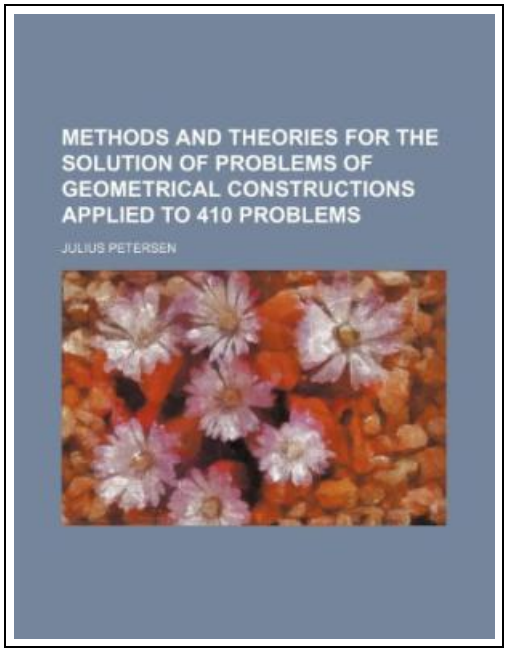
Methods and Theories for the Solution of Problems of Geometrical Constructions Applied to 410 Problems



Filesize: 2.27 MB

Reviews

It is simple in go through preferable to comprehend. It is full of wisdom and knowledge It is extremely difficult to leave it before concluding, once you begin to read the book.
(Leif Predovic)

General Books LLC. Paperback. Condition: New. This item is printed on demand. 30 pages. Dimensions: 9.7in. x 7.4in. x 0.1in.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1879 Excerpt: . . . INTRODUCTION. I repositions in Geometry appear in a double form; they either express, that a certain figure, drawn in a certain way, satisfies certain conditions, or they require a figure to be so constructed, that certain given conditions are satisfied. The first form is the theorem the second the problem of construction. In solving problems of construction certain tools are used, viz: a straight edge, by which a straight line may be drawn through two joints, and a pair of compasses by which a circle may be described from a given centre with a given radius. Any solution of a problem will therefore be a combination of these two operations. Being thus restricted, it follows that many problems apparently simple can not be solved (f. inst the trisecting of an angle, squarirg of a circle etc.); in generr. l it can be proved to be the case, where problems lead to equations, which can not be reduced to equations of the first or second degree. A problem is more than determinate when more conditions than necessary for the solution are given; determinate when there is a finite, indeterminate when there is an infinite number of solutions. In solving the determinate problem there must be stated: The mod: : of proceeding, The proof of its correctness and The discussion, i. e. stating the limits of the given quantities in order to have o, 1, 2 etc. solutions. Among the indeterminate problems those are of special interest,...
