Reviews

This sort of pdf is everything and made me searching forward plus more. Better then never, though i am quite late in start reading this one. You may like just how the author compose this book.
(Mae Jones)

PROGRESS IN ALKALOIDAL CHEMISTRY DURING THE YEAR 1904 (CLASSIC REPRINT)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Progress in Alkaloidal Chemistry During the Year 1904 The chemistry of alkaloids has received many valuable contributions during the year of 1904. While the year s work cannot show such important syntheses as those of atropine and nicotine, accomplished during the preceeding year, many investigations of great importance fall to the credit of last year. The constitution of some alkaloids, for example, that of ricinine, has been completely established. The researches of Knorr and others upon the constitution of morphine are bringing this important problem very near to its solution. The relations between the other opium alkaloids and the constitution of some of them, e.g., apomorphine are also being cleared up. The constitution of conhydrine and of the different coniceines also promises to be very soon worked out. The identity of lupinidine with sparteine was shown by Willstadter and his collaborators. Papaverine and cotarnine received a great deal of attention last year and many interesting derivatives of these bases were prepared by various investigators. New color reactions for the indentification of some alkaloids were discovered by Reichard and others and the presence or absence of certain alkaloids in certain plants was also definitely established. Only one new alkaloid, skimmianine, was discovered during 1904. I shall now take up in alphabetical order all those alkaloids the chemistry of which was investigated during 1904 beginning with two investigations on some general properties of the vegetable bases. Alkaloids. Their influence upon certain reactions of oxidation. K. Feder has investigated the influence exerted by alkaloids upon certain reactions of oxidation. Schlagdenhaufen and Schaer had already shown that while an aqueous solution of mercuric chloride had no effect whatever upon...
