The MIT Press. Paperback. Condition: New. 144 pages. Dimensions: 7.0in. x 5.0in. x 0.6in. The future is like an unwritten book. It is not something we see in a crystal ball, or can only hope to predict, like the weather. In this volume of the MIT Presss Essential Knowledge series Nick Montfort argues that the future is something to be made, not predicted. Montfort offers what he considers essential knowledge about the future, as seen in the work of writers, artists, inventors, and designers (mainly in Western culture) who developed and described the core components of the futures they envisioned. Montforts approach is not that of futurology or scenario planning; instead, he reports on the work of making the future -- the thinkers who devoted themselves to writing pages in the unwritten book. Douglas Engelbart, Alan Kay, and Ted Nelson didnt predict the future of computing, for instance. They were three of the people who made it. Montfort focuses on how the development of technologies -- with an emphasis on digital technologies -- has been bound up with ideas about the future. Readers learn about kitchens of the future and the vision behind them; literary utopias, from Platos Republic to Edward Bellamys Looking Backward and Charlotte Perkins Gilmans Herland; the Futurama exhibit at the 1939 New York Worlds Fair; and what led up to Tim Berners-Lees invention of the World Wide Web. Montfort describes the notebook computer as a human-centered alterative to the idea of the computer as a room-sized giant brain; speculative practice in design and science fiction; and, throughout, the best ways to imagine and build the future. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.
