Univ Europeenne, United States, 2014. Paperback. Condition: New. Language: French . Brand New Book. L accompagnement du patient constitue un element cle dans l education therapeutique d une personne atteinte de maladie chronique. Pourtant, si le concept d accompagnement souvent retrouve dans la litterature possede de nombreuses definitions, les pratiques correspondantes, sur le terrain des soignants, ont ete tres peu decrites en education therapeutique. L objectif de cette etude consistait a decrire les pratiques d accompagnement psychosocial realisees par les soignants. Une approche qualitative exploratoire a ete realisee en 2007 aupres d une equipe de 7 soignants engages dans l education therapeutique de 90 enfants atteints de mucoviscidose au CHU de Nantes. Cette recherche a mis en evidence, aupres de cette equipe, la realite d un accompagnement psychosocial informel majeur lors du suivi individuel des enfants qui correspondait a quatre types de pratiques: des pratiques visant a instaurer une relation de confiance et une communication de qualite; les pratiques de gestion des emotions des patients; celles d anticipation des problemes; et les pratiques de resolution des problemes psychosociaux amenes par les patients.
