ALUMINA-TITANIA OVERLAY COATING ON METALS

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Surface Modification | Plasma spray technology is being widely used for development of protective coatings to prevent degradation of critical components (machine/structural body) operating at different environmental conditions. Ceramic coatings are used to provide a dense and hard surface resistant to abrasion, corrosion, cavitation, oxidation and thermal barrier purposes etc. Plasma sprayed ceramic coatings, for their higher strength-to-weight ratio and superior wear-resistant properties, are preferred in most tribological applications. One less studied...

Reviews

It is one of the best publications. It is definitely simplistic but exciting in the 50% in the ebook. I am very happy to let you know that this is basically the greatest publication I have ever gone through within my own existence and could be the greatest PDF for ever.

-- **Dr. Anya McKenzie**

It is one of the most popular publications. It is actually written in easy words instead of confusing. You will like how the author created this book.

-- **Art Gislason**

Definitely one of the best books we have at any time gone through. It is actually filled with wisdom and knowledge. I am quickly able to get a delight from studying a published book.
