THE EVALUATION OF TWO AND THREE-CENTER INTEGRALS ARISING IN CALCULATIONS ON MOLECULAR STRUCTURE (CLASSIC REPRINT) (HARDBACK)

Forgotten Books, 2017. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The Evaluation of Two and Three-Center Integrals Arising in Calculations on Molecular Structure The expression of the solutions of Schrodinger s equation for the electronic configuration of a molecule as a linear combination of given atomic orbital functions transforms Schrodinger s equation into a matrix equation. The solution of this matrix equation involves the evaluation of certain three and six-dimensional integrals referred to as one and two-electron integrals, respectively; The domains of integration of the integrals are all of Euclidean three and six space. Some of the general techniques for evaluating these integrals involve integrating over certain of the variables, transforming the integrals into series of one and two-dimensional integrals. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
