

Business Arithmetic Secondary Schools (Classic Reprint)

By Ernest L Thurston

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Business Arithmetic Secondary Schools The use and applications of number vary with the changes and development of our industrial, commercial and social relations. The arithmetic of to-day is not the arithmetic of ten years ago. The fundamental principles and processes do not alter, but new applications constantly develop and older applications lessen in usefulness. In this sense, arithmetic is a living subject which deals with living phenomena. In these days arithmetic is commonly used not only for the necessary routine computations incident to our private, business, or scientific affairs, but its processes are called upon to study facts through number and to interpret these facts - to put number into things rather than to take number from them. Moreover, the modern use of number often takes the form of a language, as in the construction or reading of numerical illustrations, and statements or statistics which are designed to impress upon others certain facts or conditions. Thus modern arithmetic may be said to have a use as a tool, i. e., for routine computation, an interpretive...
