Excerpt from Notes on Chromic Iron Ore: Its Modes of Occurrence, Mining, Dressing, Uses, and Value; With a Register of New South Wales Localities In 1892, Mr. Wright, a chemist at Mittagong, interested himself in a group of chromite deposits on the east fall of Mooney Mooney Range, about 4 miles north-easterly from Coolac railway station. These eventually became the scene of the first practical mining operations, over tons being dis patched from them during 1894: and 1895. The site, originally known as Wright s Mine, afterwards became the Vulcan Mine. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. This type of publication is almost everything and helped me looking forward and much more. I am quite late in start reading this one, but better then never. You wont really feel monotony at whenever you want of your own time (that's what catalogs are for relating to if you ask me).
